

IMTES MANUFACTURING TECHNOLOGY

ABOUT US

We have been performed the turnkey production, on-site installation and post installation services of the Vakıfbank ATM cabins since 1996.

We have been proceed to manufacturing with additional production processes in our factory which has 4500 m2 closed area on Başkent OSB since 2010. Our production is accelerating on cabin production area with the new investments of electrostatic powder coating facility with conveyor, silk screen printing, plexiglass sizing and shaping, LED lighting systems. With these supplementary capabilities, we are developing by focusing on custome satisfaction as qualified and affordable.

ABOUT US

Production is our business...

We achieving our productions with the meticulousness and precision coming from our experiences working with defence industry. We plan, design and produce.

We are assertive on installation...

We disburden your assembly and setup works including subscription in your name, installing the electrical and data lines, preparation of platform or concrete floors.

We do not let you down...

Persistence of the services is important for us too. Against the possibilities of service necessity and breakdowns, we always store the equipments used in the production and assembly processes. We are on service even on the holidays.

DESIGN

We design your products according to your desires in terms of aesthetic and usage. We work for creating difference with the help of technical softwares, experienced personnel and technical accumulation by adding innovative and contrary specifications to your products following your path of your expectations.

Innovativeness in our spirit !

PRODUCTION

We are faster now...

With our factory order, we complete our productions %80 faster. We bring production support to your demands within minimum time.

With the discipline and precision that we gain from our experiences on the domestic and foreign defence industry, we produce, assemble and install the products on their own places.

Including the powder coating, screening and chopping; we complete all the outputs in our factory borders. Every process is passing the review of the quality control department.

Production and installation datas are stored indefinitely.

ASSEMBLY AND COATING

We gain time and quality with our new coating facility.

We care worker security and environment...

Including our manufacturing and assembly lines, we aim the work and worker security and provide possible risks while examining your installations.

Your ATM devices can be stored at our warehouses and send to desired place with the cabins.
